

# VIZITAG™

AS CLEAR AS DAY!

**Take Action Now!  
Reduce Road  
Deaths!**

**BECAUSE LIFE  
IS PRICELESS**

Accidents involving stray animals can result in lives being lost and your being held liable for damages.

## TAKE ACTION NOW!

As clear as day, Vizitags™ are visible from 500 m away when illuminated by vehicle headlights... even in heavy rain and mist. They are designed to prevent motorists from hitting livestock at night or in poor weather conditions!

This UV resistant, plastic eartag is durable and designed to withstand the harsh South African weather. There is space to write in a name, number or code.

The curved edges and flexibility of the eartags help ensure that they don't snag. Tagem's patented double-locking system means the tags can't come loose.

You can choose to have the tags branded with your farm logo, a QR barcode added or an alphanumeric sequence.

Available in F4 size

## TAG ONLY ONCE!
